Milwaukee Harbor CDF

Project Features

- Milwaukee Harbor CDF is an in-lake facility attached to land in Milwaukee, WI located at the south end of Milwaukee Harbor.
- Navigation Project Served: Milwaukee Harbor
- The CDF was constructed in 1975 under authority from Section 123 and has five to ten years of capacity remaining.
- Milwaukee Harbor CDF has an area of 44 acres, has a total capacity of 1,600,000 cubic yards, and receives about 38,300 cubic yards annually.
- The CDF is owned by the City of Milwaukee and is operated by the US Army Corps of Engineers.

Beneficial Use Information

- The material in this site has a fine grain size.
- Direct transportation access to the CDF is available via road and water in addition to possible transportation access by rail within one mile of the site.
- The US Army Corps of Engineers has the authority to remove or sell material from this CDF. Interested parties can contact Mr. James Bonetti at James.A.Bonetti@usace.army.mil.

Post Closure Use

- The intended post closure use of Milwaukee Harbor CDF is intended for a ferry dock.
